### **MBR Scholarship Fund**

As **MBR Wastewater Treatment**, we believe that the plants we design are environmentally responsible and we are proud to be working with 100% efficiency in all of our facilities. In recent years, with the support of green hotel certificates, hotel investors started to pay more attention to Recycling Systems. Environmental awareness in our hotels is essentially important in terms of cheap and plentiful clean water, sustainability of tourism with clean beaches that are compliant with EU norms and also customer satisfaction provided by our investors.

**MBR**, which is one of the most reliable companies in recycling of wastewater and grey water, launched a social responsibility project due to the increasing demand of hotels for **Containerized Re-use Plants**.

Young Tourism Leaders which pioneers new formations in tourism, has established a Scholarship Fund in order to support students studying in the field of tourism. As **MBR**, we contribute to this fund from every sale we realize.

With **Environment Friend – Student Friend Hotels** project, a portion of the Re-use Plant sales will be donated to this Scholarship Fund in behalf of the hotels purchasing the plant from **MBR**. The names of those hotels will be announced as Environment Friend – Student Friend Hotel in Young Tourism Leaders web site and organizations and also in press releases.

**SAS Group**
