MBR Tourism Technologies Summit 2013

MBR Wastewater Treatment, as a company adding value to Turkey's tourism, became sponsor of Tourism Technologies Summit 2013 (TTZ 2013). Latest trends in tourism will be held during the summit.

Compact treatment systems provided by **MBR Wastewater Treatment** are spreading as technology and customers' awareness on environmental aspects are developing. Together with the use of **MBR Containerized Re-use Plants**, hotel managers both have the opportunity to get green hotel certificates and major savings from water consumption as the system re-uses treated wastewater. During TTZ 2013, **MBR** will present some cases both domestic and international to show realized works of **MBR Containerized Re-use Plants** and also present benefits of using **MBR** plants and the quality of effluent.
