### **MBR – Visera Energy Cooperation**

Both are representative of recent technologies in their fields, Turkish-UK partnership **MBR Wastewater Treatment** and Turkish-Italian partnership Visera Energy made cooperation agreement.

Visera Energy manufactures multipurpose hydrolic turbines. Those turbines in the range of micro up to 10MW installed capacity are engineered in Italy and manufactured 100% in Turkey. The major significance of Visera is its ability of energy production in alternative systems as well as hydro electric power plants.

- **Wastewater treatment systems** (applied into the output of the plant. Results the plant works without electricity cost)
- Desalination plants
- Water pipelines and potable water networks (special technology working without grease, applied to replace pressure decreasing valves and creates income rather than cost)
- Irrigation systems
- Cooling systems
- Containerized systems
